

Tell Sen. Reid: Lead Bullets **Poison** Kids

Lead poisons families and the environment. So why is the U.S. Senate trying to block efforts to protect kids and pregnant women from the toxic lead in ammunition?

The so-called “Sportsmen’s Act” (S. 3525) would prevent the federal government from regulating toxic lead products used in hunting and fishing. But non-toxic alternatives are readily available — so there’s no excuse for contaminating our environment.
