Fold this panel first

Dear President Obama,

The Keystone XL pipeline would be an environmental disaster. Please keep your promise and reject this dangerous project.

This pipeline simply isn't in our national interest and no permits should be granted for it. If this pipeline is built it will:

- Transport tar sands oil, the dirtiest, most destructive fossil fuel on Earth
- Fuel our addiction to energy sources causing the global climate crisis
- Spill oil (your own government engineers admit that)
- Jeopardize rivers, streams, wildlife and pristine places across America

Millions of Americans like me want safe, sane, clean energy. Keystone XL isn't the answer. We're counting on you to reject Keystone XL and keep your promise to end our dangerous addiction to oil and address the global climate crisis.

Signed,
