

## **TAKE THE PLEDGE TO SAY NO TO KEYSTONE**

Keystone XL is an environmental nightmare. If we're going to stop this disastrous project and preserve a safer, saner future for our planet, we have to take to the streets and town halls and store fronts and the pipeline route to make our presence felt. President Obama needs to hear from Americans in every corner of the country.

Please join with the Center for Biological Diversity in signing our pledge to stop Keystone XL and stand with tens of thousands of people rising up for a future that preserves the animals and the wild places we all love.

***“I oppose the Keystone XL pipeline and pledge to join others in my community in peaceful, public protests, and if necessary, engage in acts of dignified, peaceful civil disobedience. I will do this to send an urgent message to President Obama to reject the Keystone XL.”***
