Re: Time to End the Whigham Rattlesnake Roundup

Dear Sirs and Madams:

I am writing on behalf of the Center for Biological Diversity, One More Generation, Protect All Living Species, and the Coastal Plains Institute and Land Conservancy to urge you, the sponsors of the annual rattlesnake roundup in Whigham, to stop incentivizing the capture and killing of imperiled snakes at your annual rattlesnake roundup. I enclose a petition with signatures from over 5000 concerned citizens, who call upon you to change your roundup to a wildlife festival where no snakes are killed.

As you may know, the Evans County Wildlife Club recently decided to replace its rattlesnake roundup with a wildlife festival that does not involve the killing of snakes. The wildlife festival will continue to generate revenue for the local community without harming the imperiled eastern diamondback rattlesnake. We encourage you to follow the example set by the Evans County Wildlife Club.

Please know that rattlesnake roundups are depleting populations of eastern diamondback rattlesnakes: Analysis of data from four roundups in the southeastern United States shows a steady decline in the weights of prize-winning eastern diamondbacks and the number collected. This once-common species is being pushed toward extinction not only by hunting pressure but also by habitat loss and road mortality. Scientific studies over the past decade have documented range-wide population declines and significant range contractions, which is why we filed a petition to protect the eastern diamondback rattlesnake under the Endangered Species Act.

We hope that this month's rattlesnake roundup in Whigham will be the last ever. The time has come to end all rattlesnake roundups.

On behalf of all of us,

Collette L. Adkins Giese
Herpetofauna Staff Attorney
Center for Biological Diversity

We, the undersigned, are writing to urge you to change the rattlesnake roundup held in your community to a humane festival where snakes are not hunted or killed. Towns such as San Antonio, Florida and Fitzgerald, Georgia have already changed their roundups to successful wildlife festivals that generate income for their communities. We urge you to follow their example and change your roundup to an event where snakes are not collected or slaughtered.
