

AUTOMAKERS ARE FUELING THE CLIMATE CRISIS.

SUVS AND PICKUPS ARE DESTROYING THE PLACES THEY'RE NAMED AFTER.

TOYOTA TUNDRA-MELTER. GMC SIERRA-BURNER.

Heatwaves. Drought. Deadly smog. Superstorms. Destructive wildfires.

We face climate breakdown while automakers leave pollution-cutting technologies on the shelf.

President Biden, automakers are stalling, and you need to act:

- Slash auto pollution 75% by 2030 by rapidly increasing EV production and cutting pollution from new gas-powered cars and trucks.
- Close all loopholes that help automakers to make more gas guzzlers.
- Ensure frontline communities have full access to affordable EVs.

PRESIDENT BIDEN: TAKE THE WHEEL. PROTECT OUR COMMUNITIES AND CLIMATE.
