Subject: SPRNCA TRESPASS COW COMPLAINT #19 2020-2021 re COWS STILL IN THE AREA CAUSING

EXTINCTION OF ENDANGERED PLANT

We filed a Notice of Intent to Sue on July 9, 2021 hoping to force Arizona State Director Ray Suazo and SPRNCA Manager Scott Feldhausen to do their jobs by ending the trespass grazing causing the extinction of an endangered species, https://www.biologicaldiversity.org/programs/public lands/grazing/pdfs/NOI-20210709-SPRNCA-TRESPASS-GRAZING.pdf.

Ignored by Suazo, Feldhausen and BLM DC leadership, we filed a Lawsuit on October 6, 2021 to seek judicial assistance in forcing Arizona State Director Suazo and SPRNCA Manager Feldhausen to do their jobs by ending the trespass grazing north of the Hereford Bridge causing the extinction of the endangered Huachuca Water Umbel. The cows are there because of Suazo's and Feldhausen's failure to do their jobs, https://biologicaldiversity.org/w/news/press-releases/lawsuit-targets-trespass-grazing-destruction-of-endangered-plant-in-arizonas-san-pedro-riparian-national-conservation-area-2021-10-06/.

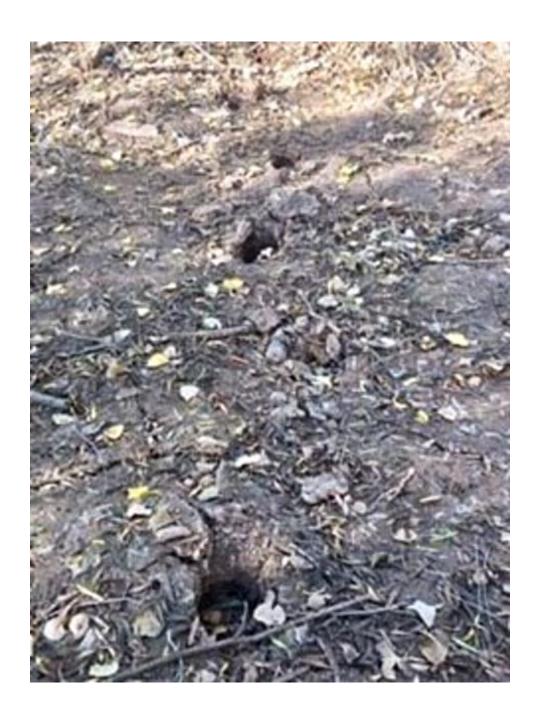

On September 22, 2021, referring to his fear of violence by local ranchers if he were to order and proceed with a roundup of trespass cows damaging SPRNCA and causing the extinction, Feldhausen said that he was "never again putting his staff in such a situation." https://www.myheraldreview.com/news/cochise_county/cbd-maricopa-audubon-file-suit-against-blm-management-of-sprnca/article_86e39594-27b0-11ec-921d-5371a77c4a86.html.

We filed an Amended Complaint on October 27, 2021,

https://www.biologicaldiversity.org/programs/public lands/grazing/pdfs/lawsuit-20211027-AMENDED-COMPLAINT-WITH-ATTACHMENTS.pdf.

This morning, November 1, 2021, a Center member again documented fresh cow sign North of the Hereford Bridge:

Subject: 11/3/21 SPRNCA Unauthorized Grazing South of Charleston Bridge

To: Scott Feldhausen (afeldhausen@blm.gov) <afeldhausen@blm.gov>, Baker, Eric <ebaker@blm.gov>, BLM_AZ

TFO_SPRNCA_RMP < blm az tfo sprnca rmp@blm.gov >

Cc: Jeff Humphrey (jeff_humphrey@fws.gov) < jeff_humphrey@fws.gov>, Ray Suazo (rmsuazo@blm.gov) < rmsuazo@blm.gov>, Julie McIntyre (julie mcintyre@fws.gov) < julie mcintyre@fws.gov>, Deb Haaland (exsec@ios.doi.gov) < exsec@ios.doi.gov>, Nada Culver (nculver@blm.gov) < nculver@blm.gov>

Good morning Eric, Scott, and all,

I'm writing to report eight (maybe more) unauthorized cattle in the San Pedro Riparian NCA in theriparian area south of Charleston Bridge (and Charleston Road).

The photos (two attached) and video (<u>follow this link</u>) show unauthorized cattle (six in the photo, and eight in the video), as well as a very blurry photo of the ear tag color, which is a minty bright green. The animals' variations in color, and the green ear tag color, should make them easy for a rancher to identify.

Please notify all area ranchers and give them a firm deadline for removal. If that deadline isn't met, please enact the BLM's unauthorized cattle removal procedure to remedy this, in the most humane way possible.

If it is dangerous to do so---with potential gun violence from the ranchers as Scott Feldhausen had indicated in our September 22nd SPRNCA Collaborative Adaptive Management Annual Meeting---please work with officials up the line to ensure a safe effective procedure.

Naturally, although your staff is stretched thin, all fence repair needed will hopefully be addressed asap. For those of you who don't frequent the river, you'd be amazed at how much damage to fragile river banks and surrounds even in 24 hours of unauthorized grazing.

We can't let our country be ruled by rancher citizens with guns, so I hope that all means will be used, all the way up to the highest authorities, to nip this stressful situation in the bud.

Thank you for your efforts in protecting this globally important migratory corridor and habitat for endangered plants and animals, as well as the citizens who cherish it.

Sincerely,

Lizann Michaud 520-249-9071 PO Box 593 Bisbee, AZ 85603

Subject: SPRNCA 2021 trespass livestock report #24

Hi Mr. Suazo and Mr. Feldhausen,

I was visiting the SPRNCA on Saturday to enjoy a hike and was really hoping I wouldn't see cows or signs of livestock trespass on my day off, but I did see some pretty recent livestock (maybe a day old?) sign in the San Pedro River. As I've been getting copies of the reports Mr. Silver has been sending, I figured I should go ahead and use his trespass report numbering system, so here is report #24. It is a big file, so I think you will get a link. Please let me know if you need this sent as separate PDFs/smaller files.

I hiked from Fairbanks down to the historic site at Boquillas Ranch so all of these locations are between those points. I've attached a pdf with a map, locations, and photos. Please let me know if you have any questions about this information and I do hope that you can get a handle on these trespass or unauthorized livestock sometime soon.

Subject: 12/6/21 SPRNCA Unauthorized Grazing North of Escapule

Attachments: 20211206_153834.jpg

Good afternoon, Eric, Scott, and all,

I'm writing to report fresh evidence of "unauthorized grazing" in the SPRNCA, just north of the river's intersection with Escapule wash on the river banks and in the river bed. Please see GPS photos in this Dropbox folder: https://www.dropbox.com/sh/ch9e3659laz3d95/AACc1IHrLecdSGxSXWwdyoqfa?dl=0 I attached one of the photos to this email in case the folder is difficult to access.

Thank you, Lizann

Subject: COMPLAINT #40 2020-22 REGARDING SPRNCA TRESPASS COWS OR UNMAINTAINED FENCING

Approximately one mile north of the Hereford bridge, 5/22/22. There is a herd of cows causing fresh damage @ 12 R 0584995/3479564. No images were captured of the cows as they are very wild and moved just to the east of the GPS mark on the River.

It is hardly even fathomable that public officials responsible for a public treasure so valuable as the SPRNCA continue to do NOTHING when the immediate area north of the Hereford Bridge is being converted from a verdant, intact location of the core and most critical population of an endangered species, the Huachuca Water, into a cowed out nuke zone. Shame on you all.

Cc: John Martin (john.h.martin@usdoj.gov)

Subject: COMPLAINT #41 2020-22 REGARDING SPRNCA TRESPASS COWS OR UNMAINTAINED FENCING

Approximately one mile north of the Charleston Bridge and continuing to about one mile further north there is extensive fresh cow sign, 5/24/22. There is a herd of cows there but only with one bull, two cows and one were clearly visualized. The bull has what looks like a "G" on its right hip and a right white ear tag.

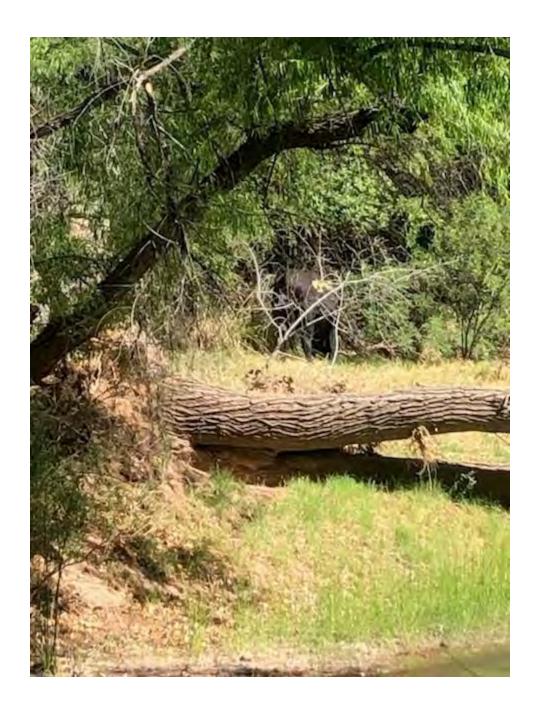

Bulls are worth a great deal of money to ranchers. There is no way that we are documenting so many bulls in the SPRNCA without the owner ranchers knowing their cows are trespassing in the SPRNCA.

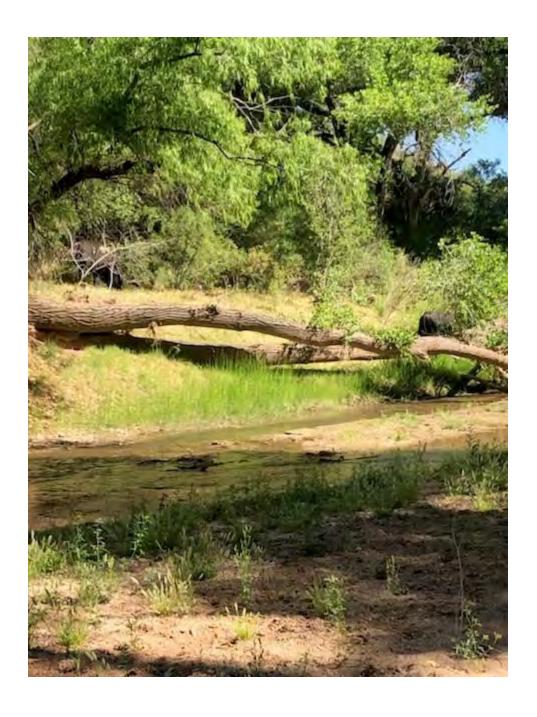

Current SPRNCA Manager Scott Feldhausen admitted publicly on September 22, 2021, that he is not rounding up SPRNCA trespass cows owing to "fear of violence by local ranchers" to his staff if he were to order and they were to proceed with a roundup. In the September 22, 2021, BLM SPRNCA Resource Management Plan Implementation Meeting, SPRNCA Manager Feldhausen said that he was "never again putting his staff in such a situation." Mr. Feldhausen was referring to his fear of violence by local ranchers to his staff if he were to order and they were to proceed with a roundup of the trespass cattle causing so much damage to the SPRNCA.

When will the SPRNCA be protected by a BLM State Director and a SPRNCA Manager that are not fearful of violent threatening local ranchers? Does the BLM have a law enforcement branch?

Cc: John Martin (john.h.martin@usdoj.gov); Heather Whitlaw (Heather_Whitlaw@fws.gov)

Subject: COMPLAINT #42 2020-22 REGARDING SPRNCA TRESPASS COWS OR UNMAINTAINED FENCING

North of the Hereford Bridge today, May 27, 2022, there are at least 27 cows (bulls, cows and calves). One of the cows looked to have a left white ear tag. GPS is 12 R 584906/3479254.

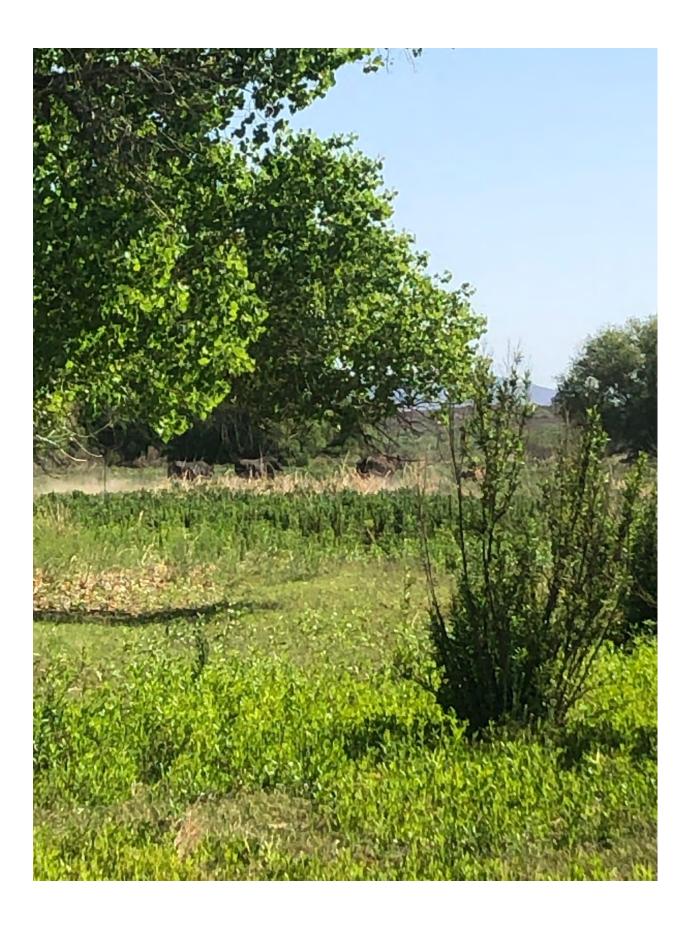

Non-native rabbit's foot grass is now essentially the only bank cover in an area that used to be the stronghold for the endangered Huachuca Water Umbel.

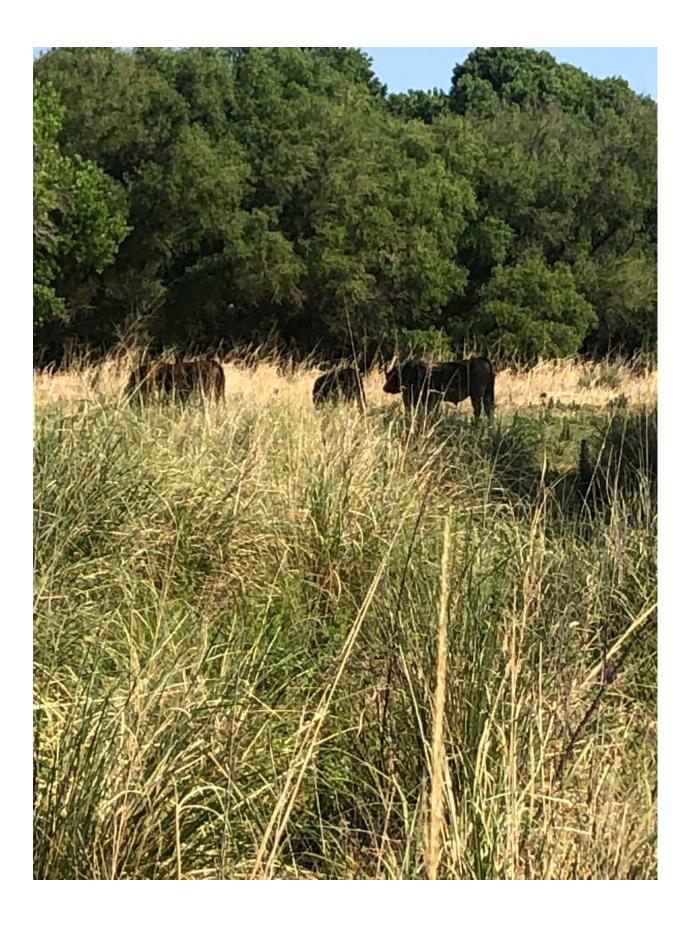

Since lack of action to protect the disappearing Huachuca Water Umbel in this area has now been going on unarguably since our notification on May 10, 2020 to BLM Arizona State Director Ray Suazo and SPRNCA Manager Scott Feldhausen (See email: Email correspondence: to Ray Suazo (rmsuazo@blm.gov) and Scott Feldhausen (blm_az_gdo_mailbox@blm.gov), from: Robin Silver; RE: Livestock at Hereford Bridge, throughout, May 10, 2020.), we can unequivocally conclude that Mr. Suazo's and Mr. Feldhausen's actions have and are now resulting in the malicious damaging and malicious destruction of an endangered plant.

USFWS Arizona State Director Heather Whitlaw is "cc" d here with the expectation that USFWS Law Enforcement will now be requested to investigate and to stop Mr. Suazo's and Mr. Feldhausen's violation of 16 U.S.C. § 1538 [Prohibited acts](a)(2) which states, "with respect to any endangered species of plants...it is unlawful for any person subject to the jurisdiction of the United States to ... maliciously damage or destroy any such species on any such area." Mr. Suazo's and Mr. Feldhausen's persistent allowing trespass cow grazing to damage and destroy Huachuca Water Umbel has certainly reached the level of "malicious" necessary to pursue an investigation and a prosecution for the taking of an endangered plant.

Subject: POST SETTLEMENT TRESPASS COW COMPLAINT #9 A HERD OF COWS AT ST. DAVID CIENEGA IN

SPRNCA

Today, this morning and midday, December 23, 2022, a herd of cows are documented with widespread fresh tracks of various sizes and fresh trails in and about the St. David Cienega in SPRNCA. The gate is wide open with trail to the gate and also further to the west. Mowed gramoids are documented. Numerous cows are heard just to the west of the Cienega. GPS of first fresh tracks inside gate is: 12 R 0572986 / 3523671. The rest of the images away from this immediate area have the GPS location included in the images.

Subject: SPRNCA POST SETTLEMENT TRESPASS COW COMPLAINT #46 COWS, FRESH FECES, TRACKS,

DOWNED FENCE IN SPRNCA NORTH OF THE HEREFORD BRIDGE after "NEIGHBORING RANCHES ...

PLANNING A GATHER ... IN MID FEBRUARY

Today, March 10, 2023, in SPRNCA we document heavy cow traffic on the east side of the River. Large swaths of habitat are soiled with fresh feces. We document cows within 100 feet of the River. The cows are both tagged and untagged. A downed fence is documented. This is the area where according to local BLM Field manager Colleen Dingman, in her February 9, 2023, biannual report for the period of August 9, 2022 through January 31, 2023 as identified in the stipulated settlement agreement filed on August 9, 2022, that "Private neighboring ranches are planning a gather and working with the livestock inspector mid-February 2023.":
