**Question:** How do you ship the medicine to us and how long can we receive our order?

**Answer:** We choose China Post to ship the medicine and most often within 14 - 28 days patients can receive the medicine. China Post has an online tracking site [http://fmnail.183.com.cn/](http://fmnail.183.com.cn/) We can provide the register number of the medicine parcel and you can check the status of it.

But please note you can only know the status within China. Once out of China you cannot know anything except you are sure it arrives at the destination country--because postal service of foreign countries do not have their responsibility to scan the bar code and input info regarding its status, we guess.
